Experience the Ultimate "Mountain Saddle Horse Breed"

For over 200 years, the Kentucky Mountain Saddle Horse has lived and flourished in the mountains and valleys of eastern Kentucky. Originally bred for varied uses on the family farm, the Kentucky Mountain Saddle Horse quickly became known for more than its versatility and heartiness, it became known and desired for its intelligence, its willingness and perhaps most notably, its smooth and natural 4-beat gait.

Today, along with its willing nature and exceptional beauty, the Kentucky Mountain Saddle Horse is admired for that easy comfortable ride that a natural 4-beat gait produces. Whether trail or endurance riding, showing, working cattle, or pulling a cart, the Kentucky Mountain Saddle Horse offers its rider the same characteristics.

In 1989, Robert Robinson, Jr. formed the KMSHA to document and preserve the ancestry of the breed and to establish and promote nationally and internationally its cherished characteristics. This breed has formally become recognized as the "Kentucky Mountain Saddle Horse." The Association's registry includes over 22,000 registered Kentucky Mountain Saddle Horses throughout the United States, Canada, Europe and Australia and New Zealand.

New owners and friends of the Kentucky Mountain Saddle Horse are invited to become members and participate in its various programs and events. For those interested in showing, the Association sponsors local and national shows, culminating at the KMSHA/SMHA International Grand Championship show held in the Fall each season. The Association also endorses local, regional, and national trail rides that are good old-fashioned family get-togethers and fun for all. The Association sponsors "The KMSHA News", a quarterly full-color magazine that keeps members informed on current topics related to the Kentucky Mountain Saddle Horses.

The Kentucky Mountain Saddle Horse is truly a horse for any reason in any season.

Discover for yourself the Kentucky Mountain Saddle Horse, today's popular, largest and fastest growing Mountain Horse breed.

Kentucky Mountain Saddle Horse™ Association

The Kentucky Mountain Saddle Horse must demonstrate the following adopted standards:

- The horse is expected to show intelligence along with an alert and willing attitude.
- Give evidence of a natural, smooth and even 4-beat gait under saddle. The "saddle gait" or as otherwise known as a step rack, is recognized and defined as a smooth but distinct and INNATE natural 4-beat gait. Be of any SOLID body color, with white accepted only on the legs, face, mane, or tail (with no spots) of dissimilar color on the upper body larger than the outside dimension of an average size hand). Mountain Horses with spots would be eligible to register with the KMSHA's sister registry, the Spotted Mountain Horse Association, SMHA.
- Be of good conformation based upon the adopted standards. Be well proportioned in the body, neck, and legs.
- Must not stand less than 11 hands (44") in height to 13.3 hands. (Class B Pony Registry). Most registered KMSH horses average between 14-16 hands (Class A Registry).

NOTES:

- A. The above are the established standards for KMSHA registration and "certification" under saddle by a minimum of two certified Examiners for all acceptable registered KMSHA horses. All horses must be certified prior to the age of four and over.
- B. The KMSHA foundation books are closed on Stallions but are still open for foundation registration of Mares and Geldings. Appendix mares may now be registered along with hardship cases for mountain horses who are registered with another registry or may confirm that they are from either Mountain horse descent or that meet the standard of the breed.
